

CHEMICAL PRODUCTS FOR THE GENERAL INDUSTRY

Comercial name	Chemical name	Use
Aceite de Ricino	Ricinus Oil, Castor Oil	Basic chemical raw material. Lubricant. Production of synthetic resins, soap manufacture. Varnishes and paints. Coatings and adhesives. Dyeing and finishing textiles.
Aceite Pescado	Fish Oil	Tanning oil in chamois skin
Aceite Vaselina	Vaseline Oil	Lubricating fat. As corrosion inhibitor. Rubber compounds softener.
Acetato amónico	Ammonium Acetate	Textile dyeing auxiliary. Preserving foods
Acetato de butilo	n-Butyl acetate	Manufacture of lacquers, artificial leather, plastics and glass.
Acetato de etilo	Ethyl Acetate	Solvent for varnishes, lacquers or nitrocellulose, textile cleaning, artificial leather, artificial essences.
Acetato de metilo	Methyl Acetate	Solvent for nitrocellulose, acetylcellulose, and many resins and oils. Manufacture artificial leather.
Acetato de Plomo	Lead Acetate	Textile printing and dyeing
Acetato de sosa	Sodium Acetate 3-hydrate	As buffer to eliminate effect of strong acids. Mordant in dyeing. Electroplate reagent.
Acetona	Acetone	Solvent for paints varnishes and lacquers. Cleaning and drying of precision instruments.
Acido acetic	Acetic acid	Delime leather acid. In dyeing. Manufacture of acetates and plastics. In preserving foods. As solvent for gums and resins. In organic synthesis.
Acido adipico	Adipic acid	Masking acid in chrome tanning. Use in manufacture of plastics, resins, lubricating oil additives and phosphates. Not hygroscopic
Acido borico	Ortoboric acid	Soft delime leather acid. Good bleaching effect. In printing and dyeing. Waterproofing and fireproofing agent. In nickeling baths. Manufacture of cements, porcelain, glass, borates. Steel hardener.
Acido citric	Citric Acid Monohydrate	Acidulant in beverages or food. Antioxidant, foam inhibitor. Sequestering agent to remove trace metals. As mordant for dyeing.
Acido clorhidrico	Hydrochloric Acid solution	Delime leather acid. Neutralization of basic systems. Hydrolyzing of proteins and starch. Cleaning metals. Catalyst and solvent in organic synthesis.
Acido fluorhidrico	Hydrofluoric Acid	In cleaning metals. Galvanizing iron. Removing efflorescence from Stone. Increasing porosity of ceramics. Polishing glass. Descomposing cellulose.
Acido formic	Formic Acid	Pickling leather acid. Reducer in wool dyeing. Descalcifier agent.
Acido fosforico	Ortho-Phosphoric Acid	Liquid fertilizer. Manufacture of phosphates. Acidulant.

Comercial name	Chemical name	Use
Acido glicolico	Glycolic, Hydroxiacetic Acid	Deliming acid for high quality leather. Masking agent Acidulant. Low corrosion equipment cleaner. In metal processing. Lubricating oil additive.
Acido glioxilico	Glyoxylic Acid	Intermediate product in perfumery. Manufacture of plastic dyes.
Acido gluconico	Gluconic Acid	Sequestering properties. In cleaning compounds.
Acido láctico	Lactic Acid	Soft deliming agent, remove lime stains. Solvent for water-insoluble dyes. Mordant in wool printing. Acidulant.
Acido nítrico	Nitric Acid	Intermediate product for dyeing. Manufacture of nitrates for fertilizers. Organic chemicals in general.
Acido oleico	Oleic Acid	In waterproofing textiles. Manufacture of oleates and soaps, lubricating oils and polishing compounds.
Acido oxálico	Oxalic Acid	Bleaching agent for tanneries, metal, paper, paint industries. To increase soaking of leather. Cleaning wood. Metal polishing. General reducing agent.
Acido peracetico	Peracetic Acid	Strong oxidizing agent
Acido propionico	Propionic Acid	Inhibitor and preservative product. Esteryfing agent.
Acido salicilico	Salycilic Acid	In dyeing. Preservative agent.
Acido sulfamico	Sulfamic Acid	As acid cleaner. Chlorine estabilization in water. Flameproofing in nitrite removal
Acido sulfúrico	Sulfuric Acid	In pickling hides. In paper, glue and metallurgic industry, manufacture of dyestuffs, fertilizers, metal treatment
Acido tartarico	Tartaric Acid	Tanning industry. In manufacture of food and drinks.
Agua destilada	Distilled Water	Most universal solvent.
Agua oxigenada	Hydrogen Peroxide	Bleaching agent for textile and others. In renovating old paintings. Oxidizer. Disinfecting agent. Metal cleaner
Almidon de maiz	Maize Starch, Corn Starch	Manufacture of adhesives products. As thickening agent. In textile finishing. In paper coating.
Almidon de trigo	Wheat Starch	Manufacture of adhesives products. As thickening agent. In textile finishing. In paper coating.
Alumbre de roca	Aluminium Ammonium Sulfate	In white tanning. Puryfing water. Manufacture of paper, porcelain and marble. In dyeing, fireproofing.
Alumbre potasico	Aluminium Potassium Sulfate	Printing fabrics. Manufacture dyes. Lakes. Paper. Explosives. In tanning. Purifying water.
Amoniaco liquid	Líquid Ammonia	Use in the Chemical Industry in general. As coolant. Manufacture of fertilizers, synthetic fibres,...etc.

Comercial name	Chemical name	Use
Anhidrio acético	Acetic Anhydride	Widely use in organic synthesis. As solvent for wool fats, oils and resins. In reactions for removing water.
Azufre floristella	Sulfur	As fertilizer. Fungicide. Manufacture of paper pulp, plastics, enamels. In vulcanizing rubber. For bleaching wool, wood and textiles.
Bentonita	Bentonite	Base for building industry materials. Oil emulsifier.
Benzoato de sosa	Sodium benzoate	Preserve in acid media. Antioxidant. Fungicide.
Bicarbonato amónico	Ammonium Bicarbonate	In tanning neutralization, as fertilizer, in cooling baths, for defatting textiles, manufacture of plastics, ceramics, dyes.
Bicarbonato de sosa	Sodium Bicarbonate	Basifying agent. Manufacture of sodium salts and effervescent salts, in baking powder and beverages.
Bicromato potásico	Potassium Dichromate	In tanning leather. In dyeing, printing and painting. For bleaching oils and waxes, sponges.
Bicromato sódico	Sodium Dichromate	In tanning leather. Manufacture of synthetic organic chemicals, dyes, prints, paints, chromates. For bleaching oils and waxes and sponges
Bifluoruro amónico	Ammonium Bifluoride	In manufacture of glass and porcelain. Brightening and mordant of aluminium. Cleaning and sterilizing food equipment.
Bioxido de titanio	Titanium Dioxide	As white pigment in leather finishes. In colorants, paints, plastics, enamels, ceramics and lacquers. Paper filling and coating
Bisulfato sódico	Sodium Bisulfate	In bleaching and swelling leather. Carbonizing pool. Manufacture of cements. Pickling metals. Remover for metals.
Bisulfito de sosa	Sodium Bisulfite	To increase soaking of small leather. Delime auxiliary with oxidazing and bleaching effect. In dyeing. In wool bleaching and disinfecting. To remove Permanganate in leather. To remove Cl in bleached paper.
Borax decahidratado	Sodium Borate Decahydrate	In soaking and preserving leathers. In cleaning. Manufacture of glaze and enamels. In fireproofing, ageing and preserving of wood and paper.
Butanol	n-Butyl Alcohol	Solvent for fats, waxes, resins, varnishes. Manufacture of detergents, lacquers, ... etc.
Butildiglicol	Diethylene Glycol monobutyl Ether	Solvent for nitrocellulose, oils, dyes, gums, soaps and resins.
Butilglicol	Ethylene Glycol monobutyl Ether	Solvent for nitrocellulose, oils, dyes, gums, soaps and resins.
Caolin	Kaolin, Hidrat. Aluminum Silicate	In dehairing pulp hides. Filler in general. Drying agent, manufacture of bricks, porcelain, cement, pottery and insulators.

Comercial name	Chemical name	Use
Carbonato de barrio	Barium Carbonate	Manufacture of paper, ceramic, enamels, paints, marble substitutes, rubber, glasses.
Carbonato de cal	Calcium Carbonate	As a filler. Manufacture of paper, ceramic, paints, plastics, rubber, gum. Against acid.
Carbonato de sosa	Sodium Carbonate	To increase soaking of leather. General cleaner. In bleaching textile. Water softener. Manufacture of glass.
Carbonato potasico	Potassium Carbonate	Tanning and finishing leather. Manufacture of glass, pottery, enamels and shampoos.
Carboximetilcelulosa	Carboxi methyl cellulose	In detergents, in paints, adhesives and as protective colloid in general. In pharmacy for preparing suspensions.
Carburo gasometro	Calcium Carbide	Generating acetylene gas with humidity for light. As reducing agent. Manufacture, welding and cutting metals.
Caseina industrial	Casein	Leather and textile finishes. Manufacture of paints, plastics, adhesives, paper and fibre.
Cianuro potásico	Potassium Cyanide	As fumigating agent. In electroplating baths.
Cianuro sodico gran.	Sodium Cyanide	As fumigating agent. In electroplating baths. Steel hardener.
Ciclohexanona	Cylcohexanone	Solvent for fats, waxes, resins, nitrocellulose and cellulose acetate, DDT.
Citrato trisódico	Trisodium Citrate 2-hydrate	As sequestering agent to remove trace metals.
Clorato sodico	Sodium Chlorate	Tanning and finishing leather. In dyeing and printing. Oxidizing agent. Manufacture of dyes and explosives.
Clorito sodico	Sodium Chlorite	Bleaching agent for textiles and paper. In water purification.
Cloro en tabletas	Trichloroisocyanide Acid	Water treatment and purification.
Cloruro amonico	Ammonium Chloride	In cleaning leather during dehair. As delime salt. In dyeing. In freezing and washing products. Manufacture of cement. In electroplating. For coating sheet iron with zinc
Cloruro calcico	Calcium Chloride Anhydrous	To control swelling in hides during dehair. Dehydrating agent. In freezing products. Anti-dust agent.
Cloruro de zinc	Zinc Chloride Anhydrous	Printing and dyeing textile. Disinfecting agent. Manufacture of parchment paper. Solvent for cellulose. Preserving and fireproofing for Wood. Manufacture of cement, rubber, cotton.
Cloruro de metileno	Methylene Chloride	Degreasing and Cleaning agent. Solvent for cellulose acetate. Paint remover.
Cloruro de niquel	Nickel Chloride	For nickel plating cast zinc. Absorbent for ammonium gas. Manufacture for ink.
Cloruro de potasa	Potassium Chloride	Use in buffer solutions, photography and electrode cells.

Comercial name	Chemical name	Use
Cloruro ferric	Ferric Chloride	In purifying and deodorizing swage. As mordant in dyeing and printing textile. Manufacture of dyes. Catalyst in organic reactions.
Cloruro ferroso	Ferrous Chloride	In water effluents treatment. As mordant in dyeing. Reducing agent. In metallurgy.
Cloruro magnesico	Magnesium Chloride	In manufacture of artificial leather, wool, cotton, cements. As fireproofing agent, disinfectant.
Colofonia	Colophony	In manufacture of artificial leather, wool, cotton, cements. As fireproofing agent, disinfectant.
Cremor tartaro	Potassium Bitartrate	In manufacture of frosting glass. For silver solders.
D-limoneno	D-Limonene	Solvent, manufacture of resins, wetting and dispersing agent.
Desdisol	Aromatic hydrocarbons mixture	Solvent for textile printing.
Despetrol	White Spirit, Stoddard Solvent	As solvent. Use in metal cleaning. Dry cleaning. Manufacture of inks and varnishes.
Dextrosa	D-Glucose monohydrate	In chrome tanning solutions. In textile printing. In food industry.
Diacetona alcohol	Diacetone alcohol	Solvent for fats, oils, waxes, resins, cellulose acetate, nitrocellulose. In antifreeze solutions and hydraulic fluids.
Dietanolamina	Diethanolamine	As humectant and softening agent. Emulsifier and dispersing agent. Manufacture of lubricants or surface products for textile.
Dietilenglicol	Diethylene Glycol	As finishing and lubricating agent for wool, cotton, silk. In antifreeze solutions. In manufacture of glues, pastes, to prevent drying out.
Dimetilformamida	Dimethylformamide	Univ ersal solvent with a slow rate of evaporation for liquids and gases.
Dipropilenglicol	Dipropyl Glycol	Solvent for nitrocellulose gums and lacquers. Manufacture of inks.
Disolgraf	Alcohol Mixture Product	Solvent for industrial cleaning. In printing industry.
Disol-limp	Alcohol Mixture Product	Universal solvent for pigmentation machine
Disolvente E-100	Normal Decane	Solvent. Use in metal cleaning. Dry cleaning. Manufacture of inks and varnishes.
Disolvente graficas	Líquid Aromatic Hydrocarbons	Solvent for industrial cleaning. In printing industry.
Disolvente limpieza	Líquid Aromatic Hydrocarbons	Solvent for industrial cleaning.
Disolvente NF-100	Naphtha-100	Used in the petrochemical industry for producing olefins in steam crackers and the chemical industry for solvent applications.
Disolvente universal	Líquid Aromatic Hydrocarbons	Solvent for paints and industrial cleaning.

Comercial name	Chemical name	Use
Dolomita	Double Calcium Magnesium Carbonate	Basifying agent in chrome tanning. Manufacture of fire bricks, refractory and insulator materials. Manufacture of paper, pottery.
Estireno monomer	Styrene	Manufacture of plastics, resins, synthetic rubber, and insulator.
Etilglicol	2-Ethoxyethanol	In leather finishing in dye solutions and water pigments. Solvent for lacquers, varnishes, nitrocellulose.
Extracto de castaño	Chestnut Extract	In vegetable tanning, firm, with a good feeling effect. Yellowish color.
Extracto de Gambier	Gambier Extract	In vegetable tanning, soft, with White color and good fastness.
Extracto de Mimosa seta	Acacia Extract	(Gran. Or powder). In vegetable tanning. Good solubility. Several types available with different characteristics and clear reddish shades.
Extracto de quebracho	Quebracho Extract	Quick vegetal tanning with good filling power and red colour.
Fanbac BT	BIT	Preservative. Fungicide and anti-bacterium
Fanbac KM-P	N-ocitilsotiazolone	Preservative. Fungicide and anti-bacterium
Fecula de patata	Potato Starch	As thickening agent. Manufacture of paper.
Flocubat 18	Aluminium Polichloride	Physical and chemical water treatment. Thickening and mud sediment in filtering process. Manufacture of paper.
Fluoruro sodico	Sodium Fluoride	In the fluoridation of water. In pesticide formulations. As disinfecting agent. In manufacture and coating of paper. In electroplating.
Fluosilicato magnesico	Magnesium Hexafluorosilicate	In manufacture of textile. As mothproofing agent
Formiato de sosa	Sodium Formate	As buffer to adjust the pH of strong acids. To increase soaking of leather. Precipitant for metals.
Formol	Formaldehyde aqueous solution	In picking and preserving hides. To improve fastness in dyeing. To render casein, albumin and gelatin insoluble. In manufacture of phenolic resins, dyes, glass. As disinfectant, fungicide, insecticide. Waterproofing agent. Preservative agent.
Fosfato biamonico	Ammonium Phosphate Dibasic	Use in fireproofing of textile, paper, wood, fibre. As corrosion inhibitor. In metal soldering.
Fosfato bisodico cristal	Sodium Phosphate Dibasic	Use in tanning. As mordant in dyeing. Manufacture of detergents, ceramic, enamels, fireproofing agents. In soldering.
Fosfato tributilo	Tributyl Phosphate	Plasticizer for cellulose esters, lacquers, plastics and vinyl resins.
Fosfato triisobutilo	Triisobutyl phosphate	Plasticizer for cellulose esters, lacquers, plastics and vinyl resins.

Comercial name	Chemical name	Use
Fosfato trisódico cristal	Sodium Phosphate Tribasic	In tanning leather. In manufacture of paper. As detergent. In softening water.
Fowoquip 250	Esters based product	Waterproofing and oilproofing agent.
Ftalato de dibutilo	n-Butyl Phthalate	To make plastics more flexible and is also in carpet backings, paints, glue and cosmetics.
Glicerina	Glycerin	As solvent. Humectant. Antifreeze. In printing. Manufacture of lubricants, glues, cements.
Hematina oxidada	Hematein	Black dyeing leather auxiliary
Heptano	n-Heptane	Cleaning in textile industry. Polymerisation solvent. Manufacture of synthetic rubber.
Hexametáfosfato sodico	Sodium Hexametaphosphate	Use in manufacture of detergents. Sequestering agent. In softening water.
Hexano	n-Hexane	Solvent for inks and varnishes. As cleaning agent. Vegetable oil extraction. Polymerization solvent.
Hexilenglicol	Hexylene Glycol	As auxiliary agent in hydraulic fluids. In cosmetics
Hidrosulfito sódico	Sodium Hydrosulfite	As bleaching agent. As reducing agent in dyeing. In removing dyes in dyed fabrics.
Hidroxido de cal	Calcium Hydroxide, Slaked Lime	In dehairing hides. Building materials, Water treatment. Manufacture of paper pulp, paints, lubricants. In fireproofing coatings.
Hipoclorito calcico	Calcium Hypochlorite	Fungicide. Bactericide. Algicide. Disinfectant. Bleaching and oxidizing agent.
Hipoclorito de sosa	Sodium Hypochlorite	Disinfectant. Deodorizer. Germicide. Bleaching agent
Hiposulfito de sosa	Sodium Thiosulfate	To remove chlorine, for example, in paper pulp. As bleaching agent. Mordant in dyeing and printing.
Isobutanol	Isobutyl Alcohol	Solvent in paint, varnish, removers.
Isopropanol	Isopropyl Alcohol (IPA)	Solvent for resins, gums, inks, essential, oils. Manufacture of cosmetics. In antifreeze solutions.
Jabon de marsella	Sodium Oleate	Emulsifier, thickener, wetting agent, metal antioxidant. In powder detergent.
Lauril éter	Oxyethylene fatty alcohol	Emulsifier and wetting agent. Degreasing
Lecitina de soja	Soybean Oil	In manufacture of fats, paints, varnishes, inks, resins.
Licuocrom 33	Liquid Basic Chrome Sulphate	In chrome leather tanning. 33% basicity. Organic reduction manufactured.
Licuocrom 42	Liquid Basic Chrome Sulphate	In chrome leather tanning. 42% basicity. Organic reduction manufactured.
Lignosulfonato sódico líquido	Sodium Lignosulphonate	As anionic dispersing agents for solids in aqueous systems. As binder, for the manufacture of adhesives. In tannery.
Litargirio	Lead Monoxide	Manufacture of enamels, porcelain, varnishes, pottery. As pigment.

Comercial name	Chemical name	Use
Litopón	Mixture of Sulphur of Zinc and Sulfate of Barium	It is used in paints, enamels, paper, white leather and white rubber.
M.E.K	Methyl Ethul Cetone	As solvent. In manufacture of synthetic resins, smokeless powder. In coating.
Marpal DC	Nonyl Phenol	Surfactant and degreasing. Wetting agent.
Marpal O	Nonyl Phenol	Surfactant and degreasing. Wetting agent.
Metabisulfito potásico	Potassium Metabisulfite	Antifermentative, bleaching agent.
Metanol	Methyl Alcohol	Industrial solvent. Antifreeze. Fuel.
Metasilicato sodico	Sodium Metasilicate Pentahydrat	Manufacture of soaks and detergents. Bleaching textile.
Metoxipropanol	Methoxy Propanol	Solvent for resins, rubber, inks. In antifreezing solutions.
Monoetanolamina	2-Hydroxyethylamine	In the synthesis of surface or agents. In emulsifiers. Dispersing agent for agricultural chemicals. In the manufacture of antibiotics.
Monoetilenglicol	Ethylene Glycol	As solvent in manufacture of paints, plastics, inks, synthetic fibre, waxes. Humectant, antifreeze.
Nitrato Amonico	Ammonium Nitrate	In fertilizers. Freezing mixtures. In pyrotechnics.
Nitrato de plomo	Lead Nitrate	As mordant and oxidizer in textile dyeing and printing.
Nitrato sodico	Sodium Nitrate	Manufacture of glass, enamels. As fertilizer.
Nitrito de sosa	Sodium Nitrite	In many organic chemical processes. In textile dyeing and printing. As bleaching agent.
N-metilpirrolidona	2-Pyrrolidine, 1-Methyl	Used in the production of acetylene and lubricating and aromatic oils. Used in paintings and as degreasing material.
Nonisol 1-I	Isopropyl Alcohol (IPA)	Solvent for resins, gums, inks, essential oils. Manufacture of cosmetics. In antifreeze solutions.
Nonisol 2-T	Methylbenzene	As solvent in manufacture of organic compounds, dyes.
Oxido de antimonio	Antimony Pentoxide	Textile fireproofing agent.
Oxido de cal	Calcium Oxide, Burnt lime	In dehairing leather. Water treatment. Manufacture of construction material, paper, glass, metals, fungicides, insecticides, lubricants.
Oxido de Zinc	Zinc Oxide	White pigment in paints, glue, cosmetics. Manufacture of driers, cements, glass, enamels, porcelain, paper. As flame retardant.
Oxido magnesico	Magnesium Oxide	Basifying agent in chrome tanning. Additive in lubricants. Manufacture of fire bricks, refractory and insulator materials.
Parafina en panes	Paraffin	In water proofing for leather, paper, wood. Manufacture of paper, candles, varnishes, lubricants, floor polishes, cosmetics.

Comercial name	Chemical name	Use
Perborato de sosa	Sodium Perborate	Bleaching agent for textile, fibres, waxes.
Percarbonato sodico	Sodium Percarbonate	Oxydazing agent.
Percloroetileno	Tetrachloroethylene	As solvent. In dry cleaning. In degreasing hides and metals.
Permanganato potásico	Potassium Permanganate	In tanning leathers. Water treatment. As bleaching agent for chamois skins, waxes, fats, oils, resins, textile.
Peroxido de MEK	Methyl Ethyl ketone Peroxide	Solvent for nitrocellulose and resins. In removing paints.
Persulfato potásico	Potassium Persulfate	As bleaching agent.
Persulfato sodico	Sodium Peroxydisulfate	As bleaching and oxidizing agent. As emulsifier in polymerisation reactions.
Piedra pomez	Pumice	Use in metal polishing. In insulating and fireproofing compounds. As filtering medium.
Pirofosfato tetrapotasico	Potassium Pyrofosfate	General sequestering agent. In water treatment. In cleaning compounds.
Pirofosfato tetrasodico	Tetrasodium pyrofosfate	General sequestering agent. In water treatment. In cleaning compounds.
Poliacrilamidas	Polyacrylamide	Flocculants for clarifying, thickening and dehydrating.
Polietilenglicol 200	Polyethylene Glycol 200	Water soluble lubricant for textile and in moulds for rubber or metal. In paper coatings. In polishes, paints, ceramics. Wetting agent.
Polietilenglicol 400	Polyethylene Glycol 400	Water soluble lubricant for textile and in moulds for rubber or metal. In paper coatings. In polishes, paints, ceramics. Wetting agent.
Potasa caustic	Potassium Hydroxide	(Liquid or flakes). In paint and varnish removers. Manufacture of soaps, inks.
Procrom 33	Basic Chrome Sulphate	Chrome tanning salt. 33% of basicity. 25% of chrome oxide.
Propilenglicol	Propylene Glycol	As non-toxic antifreeze. Fungicide. Inhibitor of fermentation. In manufacture of synthetic resins.
Sal	Sodium Chloride	(Centrifuge, Fine and Granular sea water salt, Rock salt, Regenia). As preserving agent. In pickling hides. In dyeing and printing. Manufacture of metals, soaps, dyes, dreezing mixtures.
Silicato de sosa	Sodium Silicate	In silica tanning. In manufacture of silica, paper, smelting. Shore up of floor. In white weighting.
Solvent PT	Propylene Glycol Methyl Ether	Solvent for resins, rubber, inks. In antifreezing solutions.
Sorbato potasico	Potassium Sorbate	As yeast inhibitor.

Comercial name	Chemical name	Use
Sorbitol	D-Glucitol	In fattening and printing leather. As humectants. In manufacture of synthetic resins, inks, antifreeze mixtures.
Sosa caustic	Sodium Hydroxide	(Aqueous solutions, flakes, pearls). Use to neutralize acids. In hydrolyzing fats. Manufacture of soaps, plastics. In water treatment to precipitate metals and alkaloids.
Sulfato amonico	Ammonium Sulfate	Delime leather salt. As fertilizer. In freezing mixtures. As fireproofing agent. Galvanizing iron.
Sulfato de alumina	Aluminum Sulfate	(Liquid or powder). In tanning leather. Purifying water. Manufacture of paper, oils, fats. In waterproofing and fireproofing.
Sulfato de cobre	Cooper Sulfate	Pesticide. For electroplating.
Sulfato de hierro	Ferrous Sulfate	As dye for leather. Reducing agent. In water treatment. As fertilizer. In manufacture of inks. Pesticides. In electroplating
Sulfato de manganeso	Manganese Sulfate	Use in dyeing. In manufacture of porcelain, varnishes. As fertilizer.
Sulfato de sosa anhidro	Sodium Sulfate Anhydrous	In dyeing and printing textiles. In drying organic liquids. Manufacture of paper pulp, glass.
Sulfato de Zinc	Zinc Sulfate	Preserving agent for skins and wood. In bleaching agent for paper. As mordant in textile printing.
Sulfato ferrico	Ferric Sulfate	Coagulant in water purification. Mordant in textile dyeing.
Sulfato magnésico	Magnesium Sulfate	(Anhydrous or heptahydrated crystals). In tanning leather. Manufacture of paper. Fireproofing. Water treatment. AS fertilizer. In weighting textile.
Sulfhidrato sodico	Hydrogen Sodium Sulfide	To control swelling in dehairing hides. Reducing agent in textile printing. In manufacture of sulfur dyes.
Sulfito de sosa	Sodium Sulfite	To increase soaking of leather. Basifying agent in chrome tanning. As reducer dyes. In bleaching textile. For removing Cl in paper and textiles. In fixing prints.
Sulfosuccinato sodico	Sodium Sulfosuccionate	As humectant in aqueous systems. Oil emulsifier in water.
Sulfuro de sodio	Sodium Sulfide	In dehairing hides and wool pulling. Manufacture of rubber and sulfur dyes. In cotton printing. In metal refining.
Talco	Talc	As filler for paper, rubber, soap. As pigment in paints and varnishes. In clarifying liquids by filtration. Fireproofing and insulator.
Tartaro emetico	Antimony Potassium Tartrate	As mordant in leather and textile industry.

Comercial name	Chemical name	Use
Tartaro amonico	Ammonium Tartrate	As mordant in textile industry
T-crosene	Trichloroethylene	(Stabilised). Solvent for fats, oils, waxes, resins, paints, varnishes, rubber, cellulose. In degreasing and dry cleaning.
Tiourea	Thiourea	In manufacture of resins. Vulcanization accelerator
Tolueno	Methylbenzene	In manufacture of organic compounds and dyes. Solvent for vegetal extraction.
Tricloroetano	Trichloroethane	Solvent for fats, waxes, natural resins, alkaloids.
Tricoloroetileno	Trichloroethylene	Solvent for fats, oils, waxes, resins, paints, varnishes, rubber, cellulose. In dry cleaning. In degreasing.
Trietanolamina	Triethanolamine	Intermediate chemical product. Solvent. Emulsifier. Penetration agent for organic liquids.
Triformiato de aluminio	Aluminum Triformate	In white tanning for fur. Mordant in leather and textile dyeing. Waterproofing agent.
Tripolifosfato sodico	Sodium Tripolyphosphate	Sequestering agent for water treatment. Emulsifier and dispersing agent. To control viscosity in oils. Peptizing agent.
Urea	Urea	(Technical grade). Cellulose softener in paper. In reactions with aldehydes to manufacture plastics and resins. Fertilizer
W.S.Disolvente	White Spirit, Stoddard Solvent	Solvent. Use in metal cleaning, dry cleaning. Manufacture of inks and varnishes.
Xileno	Xylene, Dimethylbenzene	Solvent. Manufacture of dyes and other organics.
Yema de huevo	Egg Yolk	Fat for shoe leather. In formulations for cosmetic creams.
Zinc en bolas	Zinc	In metal galvanizing
